

Let

$$F(x, y) = \langle 2x + y + 2, x + 3 \rangle$$

C_1 be the upper unit semicircle oriented counterclockwise

C_2 be the line segment connecting $(1, 0)$ to $(-1, 0)$

Compute the amount of work done by $F(x, y)$ acting on an object

1. as it moves along C_1
2. as it moves along C_2
