

Recap of Paradoxes from Jones

- ▶ **Paradox of Redistribution**

A voter's weight increases (or decreases) and their power decreases (or increases)

- ▶ **Paradox of a New Member**

A new voter is added while the weights of the other voters are kept proportional. The power of one of the original voters increases.

- ▶ **Paradox of Large Size**

Two voters combine to form a coalition, but the power of the third voter increases.
