

# Weights in the Council of Ministers in the EU in 1958

<b>Country</b>	<b>Weight</b>
Germany	4
Italy	4
France	4
Netherlands	2
Belgium	2
Luxembourg	1
Quota	12

# A Simple Apportionment Example

Our mythical tiny nation is composed of three states:

State	Population	% Population
A	11,000	37.9
B	15,000	51.7
C	3,000	10.3

- ▶ If the legislature has 43 members, how many reps does each state receive?
- ▶ What if the legislature has 44 members?

## More than two alternatives

Wheaton has just received a \$500 million gift.

The three options with most support are:

- A. *Renovate all academic buildings not recently done*
- B. *Renovate all campus dorms*
- C. *Slash comprehensive fee dramatically*

The committee members rankings are

10	$A > B > C$	6	$C > B > A$
0	$A > C > B$	3	$B > C > A$
6	$C > A > B$	6	$B > A > C$

What do we do with the money?
