1. Use the Fast Power Algorithm to compute $5^{615} \mod 617$

2. Use the Extended Euclidean Algorithm to find u, v such that $5u + 617v = \gcd(5, 617)$

3. Use Mathematica to calculate $2^{10,116,848,610} \mod 10,116,848,611$
