

1. At [districtr.org](https://districtr.org) view the North Carolina 2011 Enacted Congressional Plan, and select *Evaluation - Election Details - 2016 Presidential Election*

Compute the Mean-Median difference and the Efficiency Gap for this data

2. Consider a state where the election split in every district is 75% / 25%, but not necessarily every party winning.

What is the Efficiency Gap in this case?
