

1. Let  $A = \begin{bmatrix} -2 & 0 & 0 \\ 0 & 1 & -4 \\ 0 & -4 & 1 \end{bmatrix}$ . Is  $A$  diagonalizable? If so, find a diagonalization.

2. Construct a matrix  $A$  with eigenvalues  $0, 2, 3$  and eigenvectors  $(1, 3, -2)$ ,  $(3, 2, 0)$ , and  $(-2, 1, 4)$ , respectively.

3. Let  $B = \begin{bmatrix} 3 & -1 \\ 1 & 1 \end{bmatrix}$ . Is  $B$  diagonalizable? If so, find a diagonalization.

4. True or False

(a) If  $A$  is diagonalizable, then  $A$  invertible.

(b) If  $A$  is invertible, then  $A$  is diagonalizable.
