Let $f(x) = x^2 + x + 1$

1. Evaluate $\lim_{h \rightarrow 0} \frac{f(1+h) - f(1)}{h}$

2. Let m denote your answer to 1.

Find the equation of the line through the point $(1, f(1))$ with slope m .

Recall that the point-slope equation for the line through a point (x_0, y_0) with slope m is $y - y_0 = m(x - x_0)$.

3. Graph $y = f(x)$ and your line from part (b) on the same set of axes.
